(54) Title: FIGURATIVE PRINT ON A PLANE PRINT CARRIER AND USE OF SUCH FIGURATIVE PRINT

(57) Abstract

The invention relates to a figurative print for a plane print carrier. In a preferred embodiment, the figurative print comprises a primary, a secondary, and a tertiary figurative element. Each of the three elements shows an angular displacement of between 0° and 90° in relation to a perpendicular view of the figurative print on the plane print carrier so that the figurative print appears with a special effect, when the print is viewed from an oblique position relative to a perpendicular viewing.
